Introduction

The constantly growing capitalization of the market, the crypto currency, and the rapid opportunity to increase investment attract many people from all over the world. New project, cryptocurrencies or tokens are appearing on a near daily basis. There's already thousands of them. And their quantity will continue to grow in the future, since increasing amount of projects are using ICO's as a way of acquiring financing.

Figure 1: Total Market Capitalization from Jan 2014 till Jan 2018 according to coinmarketcap.com

Existing exchanges are not able to cope with so many tokens and customers. Exchanges are not able to add to the list all existing coins and tokens, often exchanges suspend the

registration of new customers, lower limits on deposit and withdrawal of funds.

Problems

Security problems

Almost all existing crypto-exchange exchanges are experiencing security problems. From time to time we learn about hacking and theft of funds from user accounts. The amount of such losses is sometimes hundreds of millions of US dollars.

Performance problems

A large number of customers and traded pairs on exchanges creates a huge load on the servers. Developers are forced to limit the number of customers, coins, tokens. This leads to a fall in the income of exchanges from trade.

Customer problems

Clients of existing exchanges are often faced with high-value fees for withdrawals of funds. This is often due to the inability of the existing software to perform the corresponding functions (scalability problems).

FTE solutions

Security

Fast Trade Exchange is built on the Sidechain technology. This ensures that there is no possibility of massive hacking customer accounts. High-performance algorithm powered by advanced encryption technology, ledger is updated synchronously, assets are much safer.

In addition to this, we have developed a unique technology for tracking such hacking activity.

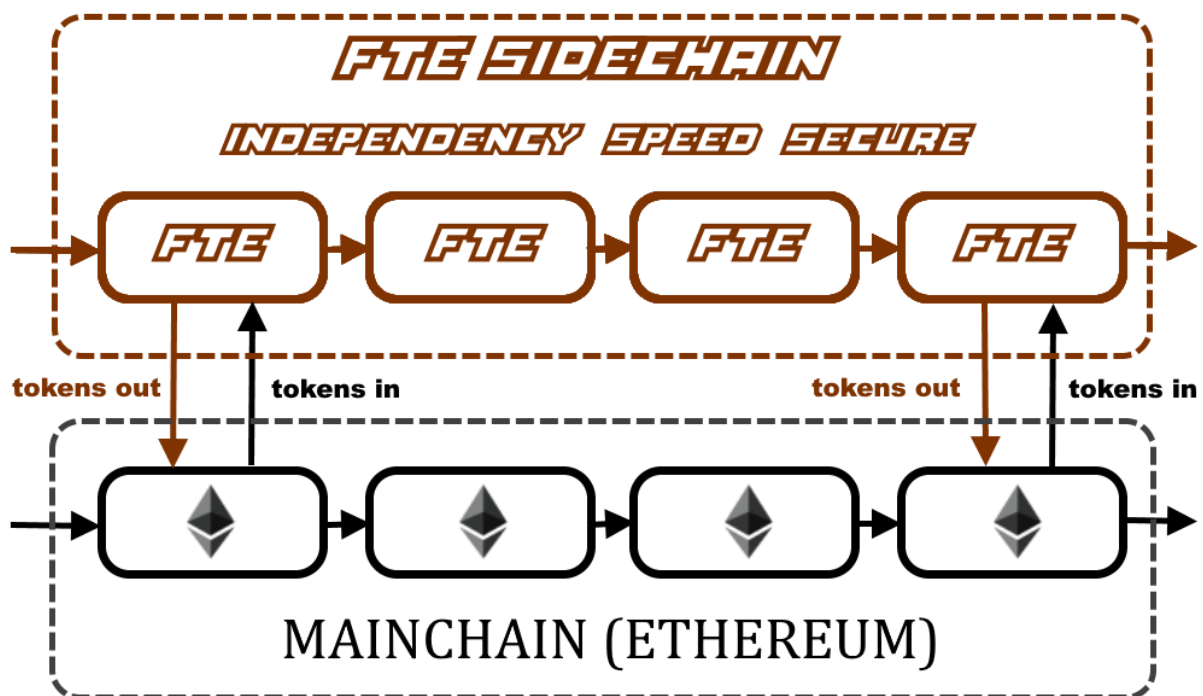

Figure 2: Fast Trade Exchange infrastructure.

Performance

The advantage of adopting sidechain infrastructure is data independency, speed and secure transaction.

Sidechain is a blockchain that runs in parallel to the main blockchain which extends functionality through interoperable blockchain networks allowing a decentralized way of transferring/synchronizing tokens between the two chains.

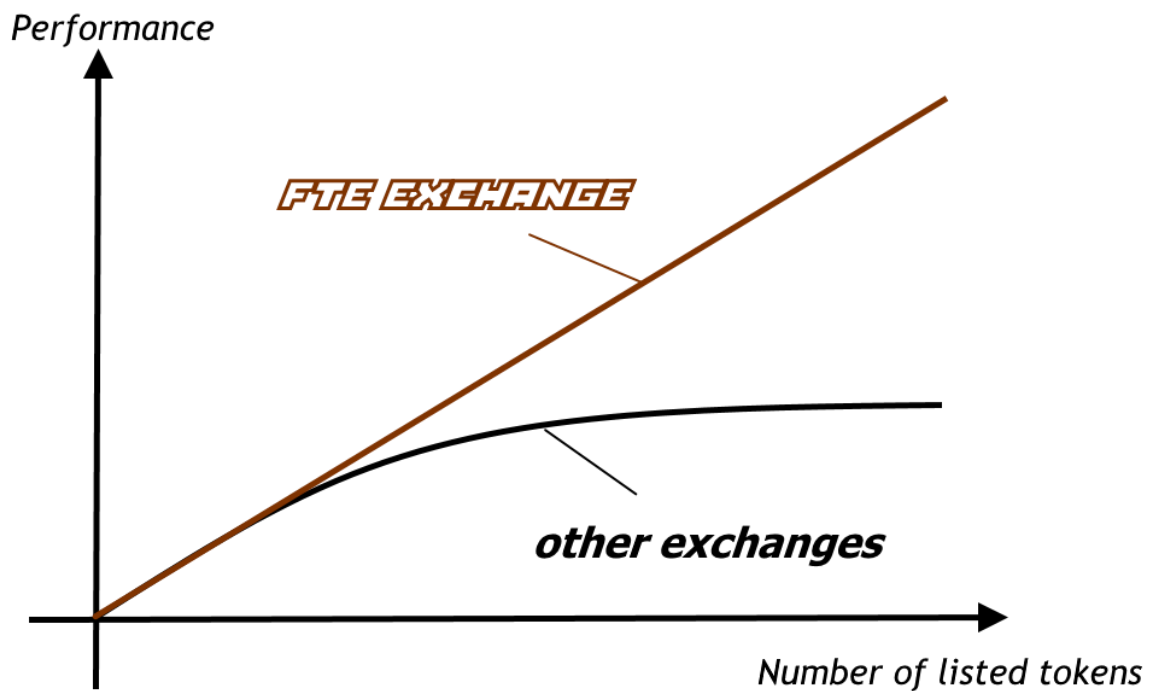

Figure 3: Fast Trade Exchange scalability.

FTE is built on one of the most advanced technology and is capable of handling ONE Million transaction per second.

Customers

FTE exchange supports a fully integrated Windows, MacOS, Linux, Android or IOS platform. Users can trade directly from any MOBILE devices fast and easy.

FTE exchange has a multilingual support and allows us to tackle any issues the customers might have, news section where customers can get the latest information about cryptocurrency market.

FTE tokens

FTE token is an ERC-20 token issued on the Ethereum Blockchain and will be supported by all Ethereum wallets.

TOKEN TICKER	FTE
ICO STARTS	APRIL 30th 2018
ICO ENDS	MAY 14th 2018
TOTAL SUPPLY	100 000 000 FTE
ICO TOTAL SUPPLY	60 000 000 FTE
FTE TOKEN PRICE	0.00004 ETH (1 ETH = 25 000 FTE)
MIN PURCHASE	0.1 ETH

Figure 4: FTE tokens information.

When you will trade on FTE exchange , our system will give you a discount of deductible fees automatically on the condition of having enough FTE tokens in your account. The cost FTE tokens will depend the market price.

TIME	The 1st year	The 2nd year	The 3th year
Discount	50%	25%	12.5%

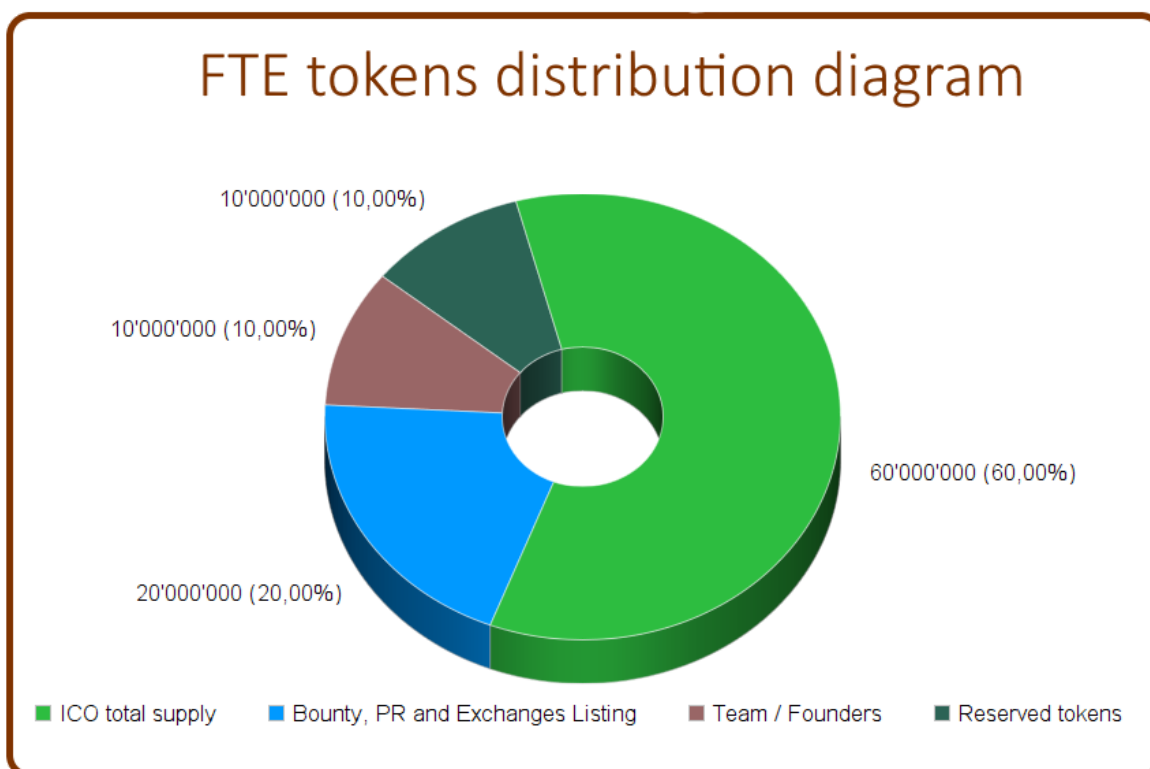

Figure 6: FTE tokens distribution diagram.

100 000 000 FTE tokens will be created!
 60 000 000 FTE tokens - Total ICO supply,

20 000 000 FTE tokens - Bounty, PR and exchange listing,
10 000 000 FTE tokens - Team/Founders,
10 000 000 FTE tokens - Reserved.

Figure 7: Raised funds distribution diagram.

55% of raised funds will be spent on developing FTE platform software,
30% - will be used for Advertising, PR and Rebranding,
15% - will be held in reserve for contingencies and other miscellaneous or unforeseen expenses.

FTE tokens sale bonus structure

	Purchase amount		
	Below 1 ETH	1 - 10 ETH	Above 10 ETH
Pre-sale	25%	30%	35%
ICO week 1	20%	25%	30%
ICO week 2	15%	20%	25%
ICO week 3	10%	15%	20%
ICO week 4	5%	10%	15%
ICO week 5	0%	5%	10%

Figure 8: FTE tokens sale bonus structure.

For example, if you make a purchase during a preliminary sale for 1 ETH you get 25000 plus a 30% bonus that is in total $25000 + 7500 = 32500$ FTE tokens.

You can check the actual price on the website <https://fte.company/> or our official telegram channel https://t.me/FTE_channel.

FTE roadmap

- DEC 2017
- The Project Is Started!
- MAR 2018
- Website created. White paper created.
- APR 2018
- Launch of ICO. Airdrop is started!
- JUN 2018
- Listing FTE tokens on exchanges.
- SEP 2018
- Final develop and launch FTE - decentralized exchange on sidechain
- NOV 2018
- Re-branding FTE exchange. New trade solutions!
- Q2 2019
- Migration FTE tokens to own blockchain - new cryptocurrency!

Conclusion

From all of the above, it can be concluded that FTE exchange will take a worthy place among other exchanges represented on the market for today.

High performance, no restrictions on quantity listed coins/tokens and low trading/withdraw fees will make our FTE exchange attractive for customers and investors.
